Weekly Work 13: Exam 3 Revisions

Due Friday, April 25th at 11:59pm

Choose **one free response problem** that you missed on Exam 3 to revise. It would be ideal to choose the problem you understood the least, so you can get the most benefit from this assignment.

Instructions:

- (*3 points*) On a separate piece of paper, redo the problem correctly, clearly showing all your work. **Do not write on your original exam!**
- (*3 points*) Explain the error in your original work or what concept you misunderstood. (Note: It's not sufficient to say something like "I misread the problem." If you did misread, you should explain what about the problem you misread and why that caused problems in your solution.)
- (*2 points*) Explain your new approach to the problem (e.g. how your reasoning changed or how you thought about the problem differently to complete it).
- *2 points* for following these instructions.

On Canvas, turn in (as a single pdf):

- A scan of your original exam work
- Your revised work and explanation of your new approach (as described above)

FAQs

- *What if I didn't miss any points on a free response problem or I only lost 1 point on a free response problem for a minor error?*

  Do your revisions for a multiple choice problem instead.

- *What if I got 100% on the exam?*

  Congrats! Just upload a scan of the front of your exam to Canvas.

- *What if I only lost points on free response for minor errors AND I didn't miss any multiple choice problems?*

  Congrats! Just upload a scan of the front of your exam to Canvas and a short explanation of the point(s) that you lost on free response. No need to do any revisions.
