Hello! I am a Phage

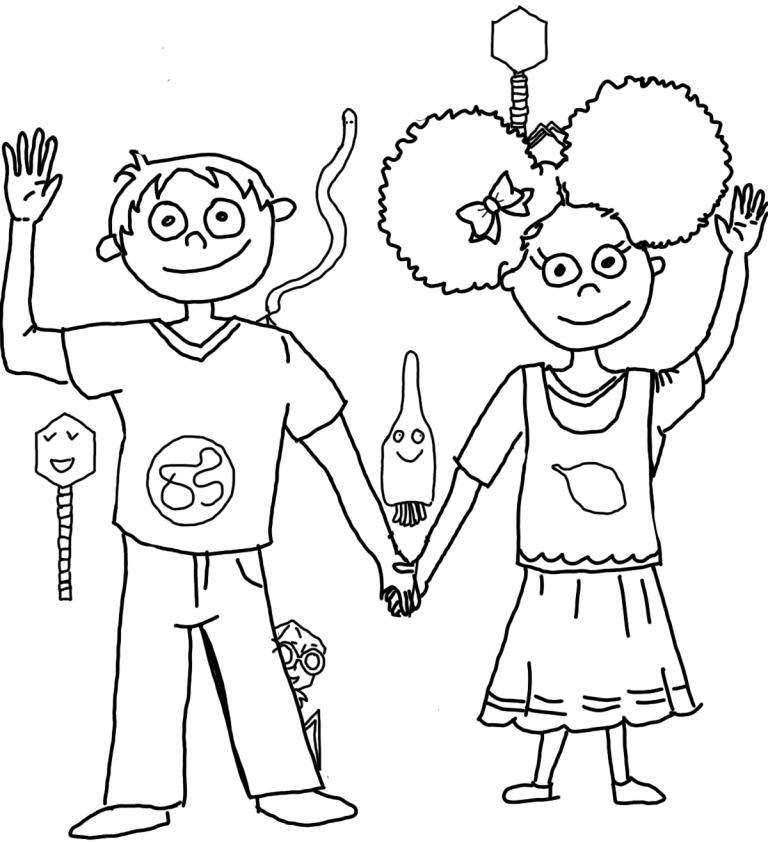

I come in many shapes

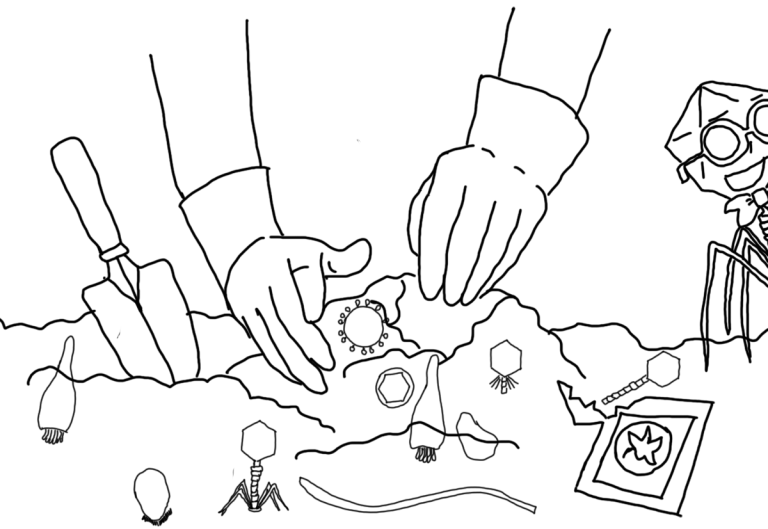

and sizes

you can find me
everywhere!

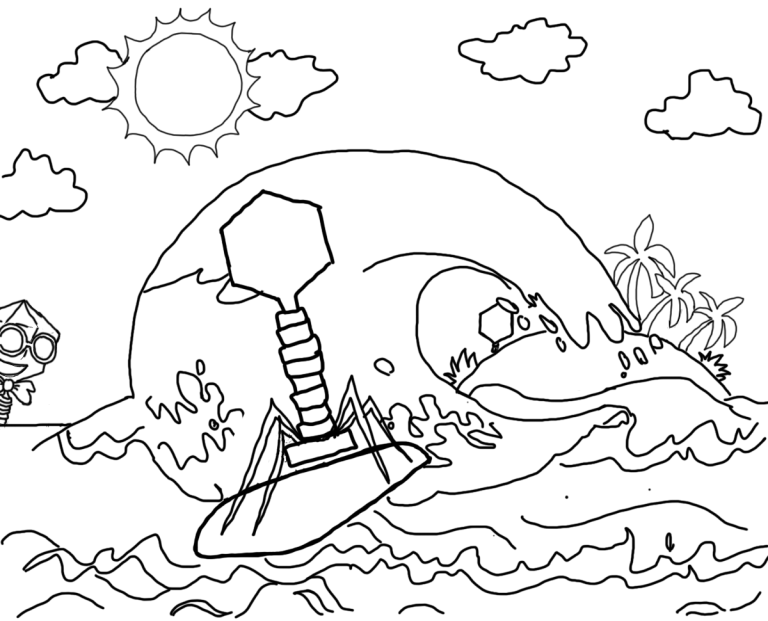

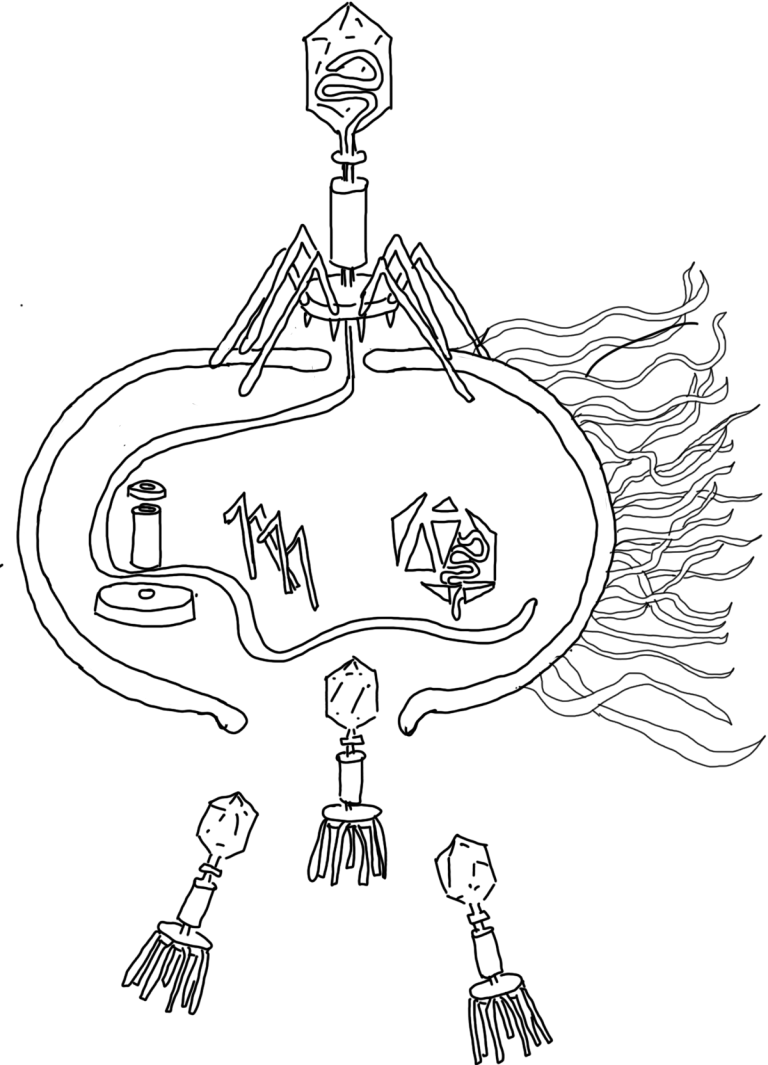

In our bodies...

...in soils...

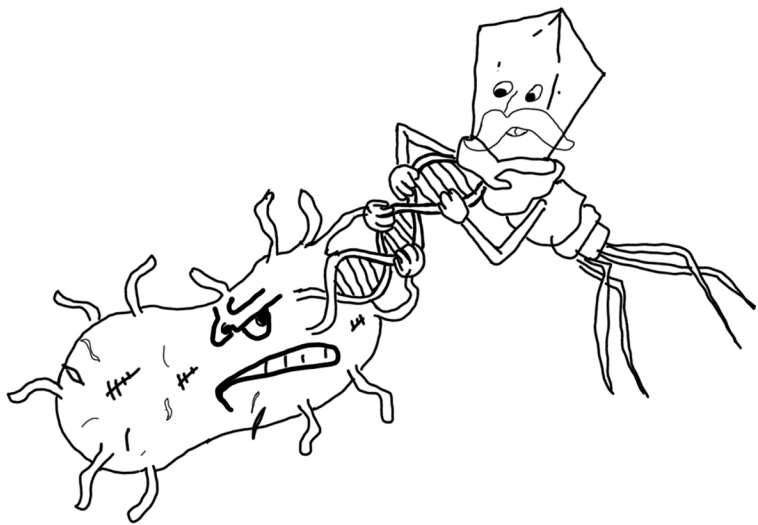

... and in water!

I infect bacteria

and can take their genes.

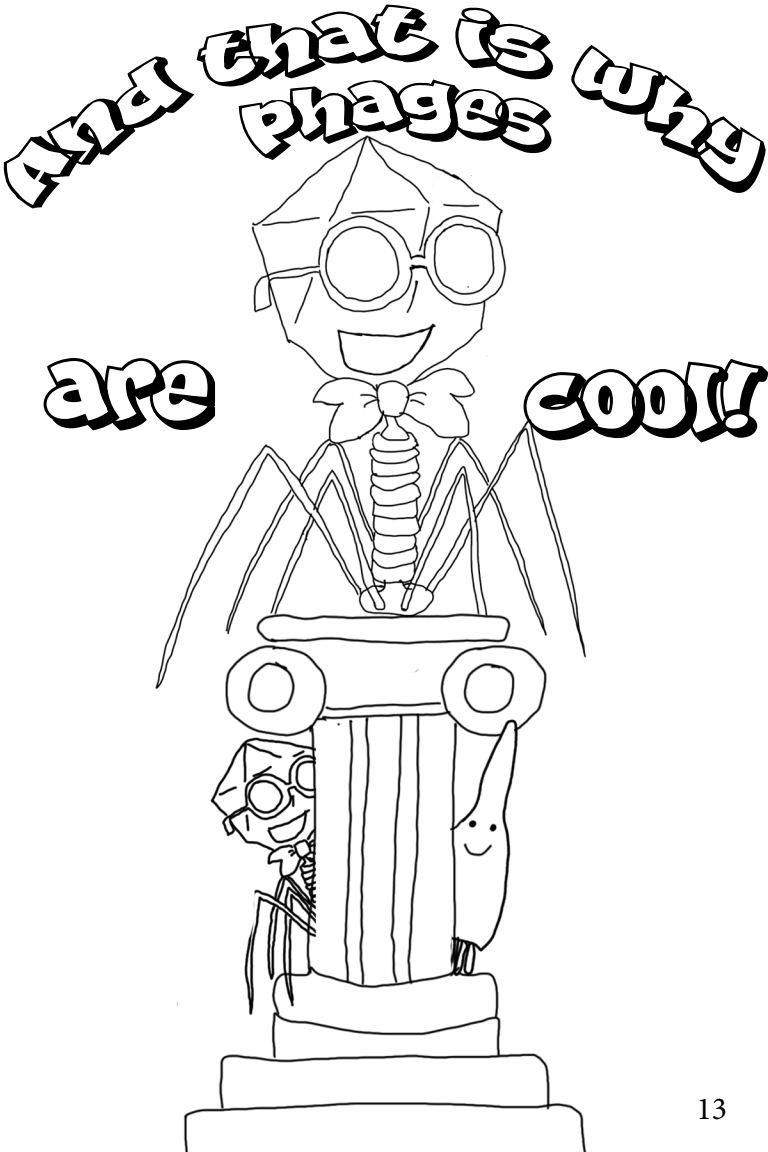

to power up the cell's
photosynthesis powers!

I can treat your infections

with phage therapy

And that is why phages
are
cool!

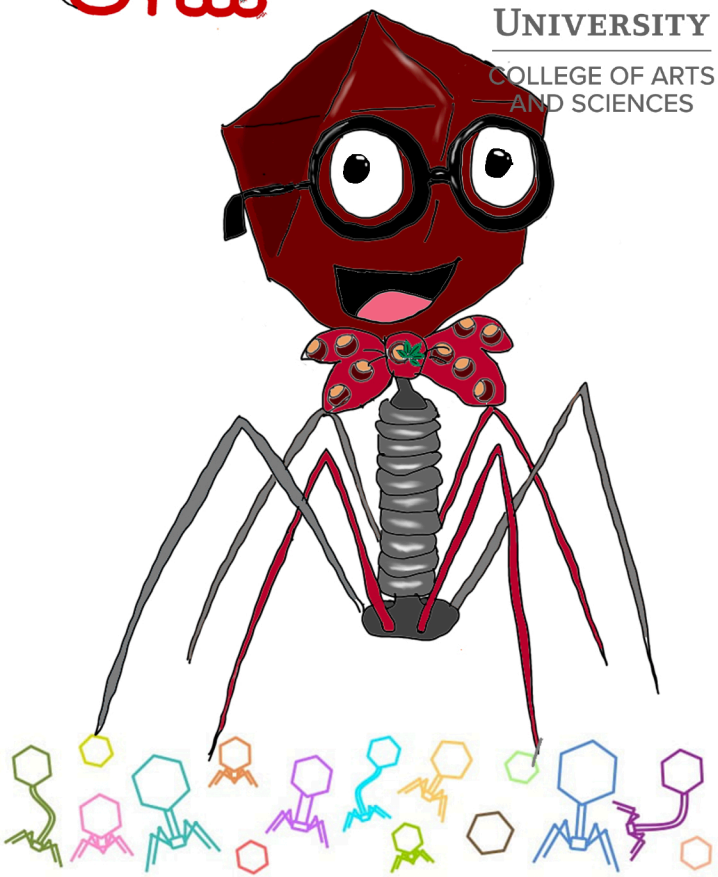

About the artist

Kimberley Ndlovu is a PhD candidate at The Ohio State University (Columbus,USA) , where she researches the human microbiome. She aspires to pursue a career in research and development. Outside the lab, Kim enjoys painting, dancing Kizomba/Semba, getting lost reading fiction and fan-fiction, and tending to her growing plant collection!
