SUMMARY

Graduation: March 2026

Political economist with expertise in American Political Economy and over five years of experience studying how public policy and regulation shape corporate and bank profits, risk and investments, financial stability, and market dynamics. Trained in econometrics and macro-financial analysis, with research published by the European Central Bank and other major policy institutions.

SKILLS AND INTERESTS

Analytical & Research: Data organization, trend identification, literature review, report drafting, policy analysis.
Research Methods: Applied econometrics, panel data, macro-financial analysis, policy evaluation, natural language processing.
Software: Excel, R, Stata, Python, MATLAB, SQL, GitHub, Open AI API.
Languages: Italian (native), English (professional), Spanish (professional), Portuguese (fluent), French (intermediate).

EDUCATION

Columbia University — New York, US
PhD, Political Science, American Political Economy - GPA:3.82. Obtained 5 grants for research ($20,000+). — 9/19 -Current

Bocconi University — Milan, IT
BS and MS, International Economics - Summa Cum Laude. Exchange Program: ITAM (Mexico City, MX). — 9/12 -10/18

RELEVANT EXPERIENCE

Communities Speak - Foundation Analysis Coordinator — New York, US, 06/24 -06/25
- Coauthored a childcare market report using enhanced data to provide policy advices for NYC's next mayor.
- Coordinated 5+ research assistants to produce client-facing visual exhibits under tight timelines.
- Managed full research workflows from NYC data collection to analysis, translating results into concise narratives.
- Built trust-based relationships with 10+ clients through effective support, including the NYC Council.

Columbia University Quantitative Methods Researcher and Instructor in American Political Economy — New York, US, 9/19 -Current
- Authored 3+ scientific articles, leading independently end-to-end research, managing 4 assistants and presenting the findings at 10+ conferences:
  - Climate shocks almost double companies' uncertainty on profits and green regulation in US States.
  - Political framing decreases U.S. energy policy durability due to polarization, -0.06 standard deviations.
  - North American tariff reductions improved exporting countries' political stability, 0.02 standard deviations.
- Built a large U.S. policy dataset to map regulatory/political risk. Reproducible AI-based NLP code on GitHub.
- Worked with cross-functional teams to develop AI models analyzing and simulating energy availability in NY.
- Independently taught 4+ quantitative research methods labs of 30+ students from diverse background.

European Central Bank Data Analysis Academic Fellow — Frankfurt, DE, 6/22 -8/22
- Co-authored an ECB WP Series paper on bank regulation showing with data analysis that banks reduce voluntary buffers (~0.30 pp) for a 0.5 pp capital-requirement increase, offsetting half the intended effect.

European Central Bank Analysis Intern in the Macroprudential Policy and Financial Stability Directorate — Frankfurt, DE, 9/20 -8/21
- Organized and cleaned large regulatory datasets and produced analytical summaries for the Credit Risk team.
- Co-authored a report about the effects of macroprudential and monetary policy on bank behavior, capital buffers, and financial stability, low inflation environment. Contributed with data analysis and visualization.
- Collaborated effectively with internal and external stakeholders in a fast-paced regulatory environment.
- Contributed to the stress-testing by preparing datasets, validating inputs, and drafting internal summaries.

LEADERSHIP

Espresso with the Experts - Video Podcast Co-host/co-founder/co-author — New York, US
Obtained funding (10k$) and conducted interviews to translate technical research into accessible narratives. — 10/23 -6/25

Tortuga - Think Tank Consultant — Milan, IT, 9/15 -8/18
- Published 5+ articles on the main Italian financial newspaper Il Sole 24 Ore blog on economics and political risk.
- Co-authored the state of the economy Report of the Italian Social Security Institute presented in Parliament.
- Co-authored and presented at the European Parliament a report on Technology Advance and Jobs.
