Sample of Book Reviews

Demography and The Making of The Modern World (2024)

... a short, accessible and balanced book.

The author is successful in using this example-led approach to emphasize the underpinning relevance of demography to wider social change and arguing for the fuller integration of population into the broader social and policy sciences... In the penultimate chapter, the author tackles "Demographic Narratives and Moral Panics," building on the groundwork in earlier chapters to show how population anxieties grow and are politicized. While such panics are ostensibly underpinned by demographic pressures, the author shows that time and again real crunch points arise from the social and policy choices we make, not the demography itself... The author plays with the "demography is destiny" precept throughout the book, demonstrating the very real importance of population change, but showing we have powerful and

potentially empowering policy choices. The book is engagingly written. Refreshingly, it has no driving agenda beyond demonstrating the importance of population trends, and how they can be influenced, mitigated, and exploited through the power of our collective actions. It fulfils its remit of offering social science students and policymakers a clear introduction to key intersections between population change and public policy.
Population and Development Review

For anyone who has an interest in the global population and how we arrived at our current population structure, this short (at 171 pages) and concise history of the global population is a must. The book is well written, free of jargon, and easy to understand. It provides an insightful introduction to the complex relationship between demography and public policy, meaning the reader does not need a foundation in demography and population geography.
The AAG Review of Books

Insurrection (2024)

This highly readable study will appeal to anyone seeking to make sense of the uprising that forever changed modern American politics. A concise and incisive look at a democracy in peril.
Kirkus Review

Short provides a powerful review of the forces at work leading up to the events in Washington DC on January 6th 202. Indeed, this book not only about the insurrection itself but also about the many factors at play in the run up to that fateful day. It treats both short-term forces such as the COVID crisis and debates about policing and racial justice after the murder of George Floyd and long term (i.e. pre-Trump) changes in the American politics from eroding trust in American institutions to the impact of new and changing media and electoral rules. Short covers the gamut and his narrative is readable and compelling. He doesn't pull punches offering a comprehensive review of the current state of American politics while also raising important questions about the potential for worse days ahead… These are important questions, and every citizen should consider them. Recommended
Choice

Short's approach to a thick description of Jan. 6 treats it as the culmination of a grand narrative of change over the preceding half century.... his thick description is of a polity in which "governing degrades into a form of political vendetta," which does seem to be the shape of things to come.
Inside Higher Ed

Thoughtful study of the polarisation in the United States that led to the attack on Congress.
The Independent

a well-written, well-structured, interesting, and informative tour d'horizon. He ranges from the increasing lack of trust in government, flaws in the electoral system, weaknesses in the constitution and the growing influence of conspiracy theories to the impact of demographic change, globalisation, deindustrialisation and social and cultural change on the political landscape of the United States. Not only based on an extensive range of sources he also puts most of his key points into their historical context…Professor Short provides a clear and detailed description of the shocking events that took place…well worthwhile reading this book
The Arbuturian

Provides a 'profound' analysis of the facts underlying the invasion of Washington's Capitol on January 6th 2021, offering a deeper context for understanding the uprising, and examining conspiracy theories and the politics of outrage."
The Bookseller

It is written in an entertaining manner which means that it should appeal to a wider audience than many political, academic books might not…. an insightful read… this is a well-written, engaging book about a time that all of us should be trying our hardest to understand.
Bookmunch

The author explores the deep flaws in US democracy that spawned the Trumpian virus in a swamp of racial and demographic division and resurgent ethno-nationalism, but also the peculiar ego of the individual who has exploited them.... offers a searing analysis of the long and short-term factors that put a demagogue in the White House and culminated in a near fatal challenge to US democracy.
Morning Star

The Rise and Fall of the National Atlas in the Twentieth Century (2022)

In this path-breaking, clearly written and altogether delightful read, John Rennie Short utilizes a critical-theory approach to address the production and content of national atlases as instruments of statecraft—interrogating 'connections between nation-state, science, territory and power'…always engaging, Short provides what I personally hope will become a provocative statement on national atlases. May this first-attempt to grapple comprehensively with the immensity of this particular form of cartographic statecraft spur new interest in their production and an entirely new body of research about them.
Imago Mundi

offers a compelling review and analysis of many of the official national atlases that have been published around the world; presenting pictures of atlas pages as well as stories, narratives, and ideological surroundings, underlying, and extending beyond the atlases themselves...
helps us enrich our understanding of how modern states continuously evolve and adjust such self-perceived properties as territories, goods, and international relations, and how those subtle ideological shifts are captured by political states in these atlases. ... draws connections between political institutions, histories, social changes, and the various things each nation has chosen to showcase in their national atlas. In preparing this work, he drew on over one hundred individual atlases, published by nations from around the world and with governments of all forms and ideologies ...An enlightening read for cartographers, geographers, historians, and anyone interested in maps and geopolitics. It spans multiple knowledge disciplines from history, sociology, geography, and geopolitics, offering comprehensive observations and critical analysis about national atlases as projects condensed of political wills.
Cartographic Perspectives

Short explores how various aspects of national atlases—from the classic representation of physical space to the more recent theme of biopolitics—help show what the governing bodies of those nations felt was important about their citizens. His discussions of the significant roles that atlases play in nations' identities and what national atlases show about the state of the world at particular historical moments are especially interesting. It makes effective use of illustrations to explain various aspects of national atlases and is overall logically organized and readable. An excellent introduction to national atlases and their place in history. Highly recommended.
Choice

The book clearly delivers a review of how cartography has been used to show how states see themselves in the world. The author to his credit does an excellent job…
The Portolan

a close reading of national atlases produced over the twentieth century from over 40 nations, including multiple editions for several of the countries. To present a balanced perspective, the author selected national atlases from countries that ranged from quite rich to relatively poor. The author was also careful to select national atlases from both capitalist and communist countries in the review.... includes plenty of history and insights covering politics and social history of the twentieth century. Throughout the text, the author has included many colour illustrations from the pages of atlases being discussed. I highly recommend this book as a fine addition to any academic library collection focused on cartography and world political history.
ACMLA Bulletin

An incredibly accessible book...the perfect read for anyone interested in cartography, atlases, maps and students of globalization, sovereignty and the nation-state.

HistorywithJackson

Hosting The Olympic Games **(2018)**

If you want to study the impact of the Olympic Games on the host city, this book is a good choice. The book reveals the true cost of hosting these large-scale sports events to the city in an easy-to-understand way. It reveals the financing of the Olympics, reviews existing research on evaluating costs and benefits, and draws on the experience of case studies from the summer and winter Olympics over the past 40 years to assess the short- and long-term urban heritage of the host city. At the same time, the book provides an in-depth critical analysis of the franchise model of the International Olympic Committee and provides another vision model for the future Olympic Games.
https://min.news/en/sport/125cf17f856f574d6d363a111569763c.html

John R. Short is another scholar who has been blowing the whistle on the hidden costs of Olympic Games, especially for host cities, for many years. In this recent release, written for a popular audience, he provides some history of the Games, but, more importantly, a step-by-step breakdown of why the Olympics costs cities much more than the IOC or bidding committees would like you to believe.

A Research Agenda for Cities **(2017)**

This edited collection seizes upon what its editor calls "the urban moment", to address some of the most pressing issues affecting cities worldwide…the aim is to give the flavour of contemporary debates in urban studies, which show the range of ways that the modern city can be analysed. What these diverse chapters share is a concern with exclusion and power relations – interrogating who loses and who gains from urban changes and ways of conceptualizing those changes…Together, these chapters show how contested urban change is…or should be.
Environment and Urbanization

A timely and topical book that explores the current century of the city …provides a series of theoretically informed and empirically driven example of the urban moment in action…highly accessible… richness of this volume
Journal of Urban Regeneration and Renewal

Recommended
Choice

Cities and Nature **(2013, 2nd ed)**

This is not an environmental studies book that just happens to focus on cities; to the contrary, the urban itself is robustly conceptualised and explicated…succeeds in providing a comprehensive overview of the field of urban environmental studies…the authors maintain an accessible tone …the book accomplishes its goal of providing a comprehensive and engaging overview of urban environments and merits serious consideration by instructors of undergraduates, as well as any readers interested in an introduction to the field.

Urban Studies

Globalization, Modernity and The City **(2012)**

Attempts a herculean task…to reveal the intrinsic interconnectedness of modernity, urbanization and globalization…supplementing with personal experience his authoritative command of the global urban experience…The book is veritably enjoyable to read…the author's consistently strong argumentation is complemented nicely by the depth of his familiarity with real world examples…opens up an entirely new set of questions.

Tijdschrift voor Economische en Sociale Geografie

This is a wonderful book with illustrative examples of how globalization, modernity and urbanity weave together.
The Canadian Geographer

A masterly narrative across history and the globe and a recommended read for any serious student or inquisitive practitioner in the domains of planning, economics and urbanism.
Journal of Urban Regeneration and Renewal

Short's personal touch and experience enhance his more theoretical arguments providing a balanced content that often absent from other publications. The author's repeated visits over time to several cities provide the basis for discussions of changes complemented by a methodology that goes beyond mere observation. Short interviewed a diversity of people to bring together perspectives that help better explain the role that cities play in their lives. Recommended
Choice

a good compendium for urban planners and economists to help them understand global development trends …the strength of the book lies in the selected case studies from all over the world, the critical reflection of the historical pathways which are essential to explain actual state of art of cities and their development perspectives
Journal of Town and City Management

a meditation on and portrait of our globalizing, urbanizing condition. Short describes a world of speed and spectacle. Through a free-range discussion that takes in megaevents, financial networks, tourism, the global market for local authenticities, and many other topics, he argues that a cosmopolitan urban future is already upon us and that things are only going to get denser and faster from here on out…the book rises to the occasion of its ambitious agenda… as a journey through a vast, ever-changing urbanizing environment, it does have a lot to say.
Economic Geography

Korea: A Cartographic History **(2012)**

John Short's history of Korean cartography provides significant contributions simultaneously to two distinct academic fields; firstly, the history of Korea; and secondly, the history of cartography… Two themes, namely cross-cultural contact and world mapping, combine to help form the book's thesis… the book makes available one of the first Western-language studies of Korean cartographic history. This makes Short's book valuable to any historians of cartography who wish to explore the history of Asian map-making from comparative and more balanced perspectives…Overall, I find Short's discussion of Korean cartographic history in the broader context of globalization insightful and astute…We must applaud Professor Short's success in writing such a book in English. While the author aimed to write a book for general readers, the final product also inspires further in- depth study of a variety of related topics… Scholars should include this concise survey of dynamic developments in future comparative studies of the history of cartography.
The Cartographic Journal

A comprehensive and highly interesting examination of Korea through maps…*Korea* is a pleasure to read, a fully satisfying and rich foray into a fascinating country as seen, by itself and by others, through maps. The archival work, methodological elegance, and convincing argumentation and writing create a scintillating exploration of and guidebook to all things cartographically related to a place that has sometimes been relegated to 'wedge' position between great powers (China and Japan, or communism and capitalism, as the case may be). Seventy-one full-colour plates are interspersed throughout the text, and it feels as though every other page has a treasure waiting behind it…A superb introduction to a fine author from whom we can only hope much more of the same is to come.
Cartographica

A very accessible and well-written general history…clearly written and beautifully illustrated.
Korea Times

a brief but compelling introduction to the role of cartography in Korea's history… the book's historical sections provide informative insights into the mapping traditions of other areas. His summation of Japanese cartographic history, for example, as well as French efforts to map Korea's interior are particularly well done, making it easy to splice Korea's history and cartographic story with other, larger narratives…Taken as a whole, *Korea: A Cartographic History* is a successful overview of Korea's history and introduction to the many beautiful maps produced by its cartographers and by mapmakers from other areas. Those interested in learning more about the subject matter can find a list of suggested readings located immediately at the narrative's end. It is well designed, attractive, clearly written, and represents a solid addition to the collection of anyone interested in its topic.
Cartographic Perspectives

a welcome addition to the existing literature. Lucidly written and beautifully illustrated [it] throws fresh light on Korea's cartographic past…This is unquestionably an engaging and important book- one that will serve to stimulate interest in Korea's cartographic past for some time into the future.
Imago Mundi

Contributes greatly to the field of Korean Studies…A meaningful contribution to the field of Korean studies, which, I believe will inspire other scholars in the field…presents future Korean studies scholars with resources to discuss new topics about the relationship between maps and history.
Korea Journal

A fascinating work on the topic…The author presents his discussion with clarity and narrates his story concisely with flair…It is an admirable effort.
The AAG Review of Books

I learned a lot about maps. I found the narrative of interactions between indigenous cartographic conventions and traditions with neighboring traditions-then very alien styles and traditions- very interesting. In particular by isolating how Korea is represented or not represented on others' maps Short drives home the main lessons of the book, namely that the gradual globalization of space as he calls it was created by interactions of various ideas of place and space…a useful addition to our understanding of Korea.
Journal of Asian Studies

Cities and Suburbs **(2010)**

With their superbly researched, provocative, and highly recommended contribution, Hanlon, Short, and Vicino are at the forefront of this approach to urban scholarship.
Journal of Planning Education and Research

This compact and well-written book is an ideal text for the many disciplines that study the confounding complexity of the U.S. metropolis. It focuses abstract discussion by presenting specific case studies and provides concise summaries, numerous citations of major work and an excellent bibliography. The perceptive and lively style makes it instructive, enjoyable reading.
Professional Geographer

a great resource for policy analysts and makers as well as metropolitan scholars in many disciplines including geography, economics, politics, sociology, urban studies, and urban planning.
Journal of Planning Literature

Provides a systematic and comprehensive analsyis of demographic and socio-economic processes occuring in the mertropoltian areas in the United States…..an important and valuable contribution
Journal of Urban Design

They examine different dimensions of diversity, including racial segregation, polarization of US society along class lines, and the advent of a new wave of immigration. All of these perspectives show an increasingly atomized, polarized, and residentially segregated US in which the "sorting-out" of different groups from one another has transcended the traditional central city-suburb distinction, and today permeates every aspect of life from workplace to home. Recommended
Choice

provides a comprehensive and in-depth analysis of the current state of metropolitan America and especially suburban decline… provides a systematic and historic overview of the changing role of American cities and suburbs throughout the past century and more. They present an excellent account of the changing roles, growth, decline, and regeneration processes in the ever-changing and diverse political, demographic, socio-economic, and physical environments of metropolitan America… a comprehensive approach that does justice to the vast, interconnected, and complex processes of metropolitan growth and decline. It is well suited for scholars of urban and regional planning, geography, economics, politics, sociology, and urban studies, and will significantly enhance their understanding of the complex issues facing metropolitan America. Students will benefit from a deeper understanding of the suburbanization of America. I appreciated the presence of an ample number of case studies and brief summaries at the end of each chapter… important addition to existing scholarship
Journal of Urban Affairs

up-to-date insights into the state of American suburbs in metropolitan contexts, based on current literature and most recent research findings. The format of the book is highly accessible. Each chapter is accompanied by a list of references for further reading and an illustrative case study… highly recommended.
Urban Geography

An enlightening and thorough new study
The Next American City

A comprehensive description and evaluation of the evolving U.S. metropolis that challenges traditional understandings of American metropolitan structure. In this well-composed publication, the authors convincingly argue that conventional models of urban America are now defunct and present compelling evidence to support this hypothesis. The book is ideally suited not only for use in undergraduate and graduate courses but also as a state-of-the-metropolis piece for academics and policy makers alike… The book is appealing in many regards. The authors should be praised for composing a work that is relatively accessible across disciplinary boundaries, as it is relatively free of excess jargon…The work is also a timely challenge to many scholars' preconceived notions of the rich-suburb, poor-city metropolitan structure.
Economic Development Quarterly

Cartographic Encounters **(2009)**

In this major re-interpretation of American history, John Rennie Short argues that until now, both writing about and popular understanding of, the exploration and mapping of the New World has largely ignored the pivotal role played by indigenous people. European mapping of the New World was the product of an exchange of information, a 'cartographic encounter' between newcomers and indigenous peoples. This encounter allowed Native Americans to parlay their deeper and wider knowledge of the land into a strong bargaining position, but in this very exchange lay the roots of the ultimate loss of their land. Based on extensive research, *Cartographic Encounters* will appeal to a general readership, specialists and students in the field of cartography, and those interested in the history of indigenous peoples. Both readable and considered, this new account of America's exploration will also force a radical change in how we view Western exploration and discovery in general.

Settler Colonial Studies

In this vital reinterpretation of American history, Short describes how previous accounts of the mapping of the new world have largely ignored the fundamental role played by local, indigenous guides...This account offers a radical new understanding of Western expansion and the mapping of the land and will be essential to scholars in cartography and American history.
Journal of Historical Geography and EBook Reviews

This short, richly illustrated book describes the historically undervalaued role that natives played in providing geograpical intelligence to US colonizers…a popular, accessible introduction to an often-overlooked issue
Journal of Interdisciplinary History

Short's consultation of original field diaries and journals yields a rich source of data…While based on deep scholarship, the book retains a flowing conversational style that is accessible to all, thereby rendering its notions even more powerful and potentially far-reaching. It is, in short, a delight to read…not only positions discovery and exploration within critical historiography but awakens as well our sense of justice and long-overdue attribution.
The Globe

Short's book drives home fundamental facts, overlooked by historians of the European Contact period…a fascinating and surprising new interpretation…reconstructs the shifting relationships between European explorers and indigenous peoples in North America and Australia. The writing is admirably clear, concise, sensitive and balanced. At once entertaining and educational, Short's book is essential for historians of New World contacts and cartography. The reader comes away with a new appreciation of the hidden artifacts of the cultural collision teasing out threads of the 'symbiotic destruction' deeply woven into the history of post-Columbian maps.
Metascience

John Rennie Short has trawled through many dusty travel journals and pored over his share of early maps in order to reconstruct this fascinating cultural collision. His book ranges widely…The accounts of the expeditions…are among the highlights of this consistently entertaining and even-handed book.
Geographical Magazine

Well-written and engaging volume…an enjoyable and thought-provoking read. Short provides many examples of the vital and indispensable role played in the Euro-American exploration of the 'New World'. The map of America was born not of discovery, but rather from cultural exchange.
Journal of Historical Geography

Effective in retelling some of the North American encounter narratives and reexamining the context of the explorers' journals, elucidating the role of indigenous-newcomer collaborations in exploration
Journal of Latin American Geography

This is a book of map and voyage appropriately available to a wide readership. Forty-nine illustrations, including early maps, persons, and scenes, meld with references, bibliography, and index to educate and entertain those interested in understanding something of the cartographic history that evolved twixt natives and European colonists in the New World.
Choice

The Sage Companion To The City **(2008)**

Packed with insights.
The Hindu

Guides the reader through a tremendous breadth of contemporary urban research

Teaching Sociology

Cities and Economies (2008)

The ability of the authors to outline the history of the world as it related to cities in such a brief book is remarkable… Important concepts are laid out in clear language and in uncomplicated interpretations
Journal of the American Planning Association

Cities and Nature (2008)

A great resource for teaching about the fundamental interconnections between nature and the built environment.
Canadian Journal of Environmental Education

Liquid City (2007)

Elegant and thought-provoking book… John Rennie Short has done a masterful job of revisualizing and documenting how Megalopolis has changed since Gottmann, and I am grateful to him for revisiting this elusive but enduring geographical proposition.
Technology and Culture

a provocative new book…Short presents facts and deals fairly with controversial and unsettled issues.
Governing.com

Short's strengths lie in his ability to use data from the U.S. Census to help create a clearer picture of not only how the megalopolis is shaped, but what sustains its growth. This book is a comprehensive and easy read that is complemented by the fact that Short presents a clearer understanding of how the megalopolis is one of the world's most important regions and is perhaps a new model to provide insight to current conurbations experiencing these changes.
Urban Geography

Short describes the tension between the fixed capital investments and the forces of change…an engaging and provocative style that will attract readers from outside the realms of geography and regional science.
Journal of Regional Science

a good overview of fin de siecle urbanization in the Northeast United States. Short's artful use of anecdotal information about specific places and broad range of topics covered at a general level would make *Liquid City* an excellent text for undergraduates. This book will interest anyone who wants a good, concise reference to demographic trends within the region
Economic Geography

John Rennie Short has decided that it is time to revisit the Atlantic seaboard Megalopolis and examine how it fares in the early twenty-first century. In a compact volume he summarizes the present state of Megalopolis, identifying its changing characteristics and persistent problems…a concise overview…thoughtful, readable survey that merits the attention of students of urban America.
International Journal of Urban and Regional Research

Short fills a void by providing a much needed update on the cardinal trends that have affected this global city region over the past fifty years…an admirable assessment of the driving forces behind megalopolis and has substantial value for both its approach and its focus of study.
Professional Geographer

Urban Theory (2006)

An insightful geographer…Short covers a great deal of intellectual territory, ranging across a number of disciplines and deftly moving from classical literature to contemporary social science, stringing the work of diverse scholars together rather cleverly.
Journal of Urban Affairs

Alabaster Cities (2006)

Superb book…nothing less than an impressive success. Weaving together numerous studies, census data and personal anecdotes, Short presents a compelling and broad story of the American city from 1950 to the present in a highly readable narrative style… most outstanding strength is its robust comprehensiveness, in terms of both subject matter and Short's ability to integrate multiple perspectives…exceptional among contemporary urban geographers…fantastic insights about the shifting demographic profile of American suburbia…sure to please its target audience while enthusing readers across a wide range of disciplines and perspectives.
Professional Geographer

an in-depth, scholarly study of urban America since 1950…Though serious-minded, drawing heavily on research, and careful not to mistake correlation for causation… *Alabaster Cities* is thoroughly accessible to lay readers as well as scholarly readers. Highly recommended.
Midwest Book Review

Offers an accessible overview to the major themes of US urbanization. In *Alabaster Cities*, Short has sung the story of American cities, both their gleaming achievements and their tears of failure.
Urban Geography

The title's 'alabaster cities' refers to a line from the verse of "America The Beautiful," and the song's optimism is threaded throughout Short's elegant narrative. The author is at once deeply appreciative of the US and deeply critical of its failures to realize its potential…His analysis of emerging trends like privatization, globalization polarization and place wars underscores the need to find alternative representations- discursive, imaginary and material- of that crowning public achievement, the city as a "fair, just and decent place to live for all its citizens." Recommended.
Choice

a clearly organized and cleanly written account of major trends in the growth of American metropolitan areas from the decades of post-1945 prosperity to the current post-industrial era. Short identifies four general themes: economic globalization; the role of public policy; the segmentation of metropolitan regions by class, race, and government authority; and the changing character of active citizenship. These are all on target, with the last being the most original as the author develops it…The maps and charts are crisply done and effectively used.
American Studies

Short's account effectively illuminates the path of American metropolitan development since 1950. It is a thoughtful volume by a geographer with a good grasp of the American city and its perceived problems. It may not offer unchallengeable answers, but it raises significant questions and deserves the attention of students of the contemporary American city.
Register of The Kentucky Historical Society

Global Metropolitan (2004)

John Rennie Short provides one of the best introductions to global cities. His discourse has contributed significantly to our understanding of how our urban world is reshaping at the beginning of the twenty-first century. In addition to familiar material on competition, migration and polarisation, Short also points to the challenge of the mega-event and urban spectacle. What happens when a city re-invents itself as a global site to attract top level sporting and cultural events? In what ways do the endless competitions and consultations

reinforce or weaken global status? The actual experience of hosting an event such as the summer Olympics is not solely about the improvement of local infrastructure and major disruption, but also repositions and connects a city into a global space of flows. Short has a particular concern with how the city is represented, how the particularities of place can be replaced by a seemingly neutral set of global assets or contradicted by the persistence of national or regional competitors for global city status
Urban Bulletin

Cities around the world are experiencing profound economic and social change as they seek to compete in a globalizing world. *Global Metropolitan* seeks to explain such changes. It explores how the discourse of globalizing has become a major narrative in the restructuring of cities around the world. It illustrates how a similar range of globalizing practices including the hosting of mega-events, the siting of urban spectaculars, the rewriting of the city, and its representation to a world of global flows. Moving beyond the debate surrounding the measurement of world cities, John Rennie Short suggests a new paradigm for urban studies; globalizing cities where the emphasis is on how cities are embarked on a global project to maintain economic competitiveness and cultural relevance. The book sets a new agenda for both globalization and urban studies.
Frontlist

a clear summary of the issues and debates surrounding globalisation and its effects... (chapters) add breadth to and interst to the understanding of global cities.
Geography

The book successfully covers the existing literature on world cities research, makes the argument for extending current debates by considering the globalization-urbanization connection through the lens of globalizing cities conceptualization, and illustrates this approach using case studies. It is a comprehensive and accessible text that is a welcome contribution to the world cities literature.
Professional Geographer

Making Space **(2004)**

a short book about a very large subject: the way in which between 1475 and 1600 the Europeans changed the way they envisioned the world…The book is logically constructed and contains much of interest.
International History Review

T*he World Through Maps: A History of Cartography* **(2003)**

one of the superlative science books of 2003
Discover

Brilliant guide to using maps…a superb resource to help us understand the maps we use.
Victoria Times

It is rare for a large-format picture book to exhibit depth of information and understanding in its text, but this one does. Built around a fascinating and beautiful presentation of historical maps, broadly construed, Short tells the history of cartography in short, easily digestible essays, each accompanied by several illustrations. He also discusses the development of cartography, cartographic techniques, cartography in different societies, and the deeper meaning of maps. His writing is straightforward, yet precise and comprehensive. From beginning to end, the story is compelling.
Ars Hermeneutica

Expertly written in a stimulating style, full of illuminating asides… useful introduction to a large and important subject.
Geomatica

Look past the sumptuous illustrations and you'll find that Short, a distinguished American geography professor, has delivered the goods and then some. With crystal-clear prose and not a jot of pretentiousness, he covers more about maps and what they tell us about the societies that created them (charts by indigenous peoples, maps as propaganda tools, cartography in the space age) than some volumes twice its size.
Globe and Mail

a handsomely illustrated introduction to the history of maps... elegantly reproduced maps that richly supplement the authoritative text... Highly recommended for all public libraries.
Library Journal

The book's chronological structure is simple yet elegant, drawing readers along as cartography develops in different lands and different cultures…with examples plucked from countless periods.
Publishers Weekly

A seductive investment…Almost every page here is voyage of discovery, and of wonder
Vancouver Georgia Strait

Provides a succinct and superb introduction….This is the type of book, which will whet readers' appetites and should inspire them to explore further … highly recommended without reservations for all academic and public library reference collections
E-STREAMS

John Rennie Short makes it clear that, aside from being sources of geographical information, maps have also been tools of propaganda, economics, politics and even religion…The book traces the history of maps—from 40,000-year-old drawings on cave walls to computer and satellite projections—and looks at the maps to divine their context, meanings and messages…Short's text is accompanied by hundreds of colour photographs and illustrations of maps, some of which are truly works of art. The book ends with two intriguing chapters that discuss maps as propaganda tools, tools of surveillance, fakes and forgeries, and cartographic controversies.
Toronto Globe and Mail

We therefore are deeply indebted to John Rennie Short, his publishers, and his producers for presenting an anthology of maps that is accurate, apposite, and very pleasing...*The World through Maps* has much to commend it. It is a book to be pored over.
Cartography and Geographic Information Society

Globalization and The Margins **(2002)**

The editors …raise an interesting and timely set of questions (they) bring together the contributions of nine scholars on globalization...This is an interesting group of academics, some distinguished, some promising, and-unlike the case in many other edited collections-their work focuses squarely on the subject. Most of the individual pieces in this collection, therefore, are informative, timely and often thought-provoking.
Annals of Association of American Geographers

Representing The Republic **(2001)**

Short's fascinating and generously illustrated book examines the changing face of maps as "social constructions" in the new found land over three centuries. Signs of the state's hegemony and technical progress are carefully noted in the locations of towns and mills; the superiority of reason is hopefully embodied in aggressively rectilinear subdivisions. Grandly inclusive maps provide a visual focus and argument for post-Civil War healing.
The Guardian

This is a fascinating book about the mapping of the land that came to be called the United States of America… Short adopts the maps as an instrument and vehicle to unfold a history of the cartographic enterprise in the US, and in so doing contributes to an understanding of the history of this nation
Choice

All those trained to use maps before c. 1990- should read pages 9-12. For many, the ideas will be shocking but, once absorbed, they are liberating. Read them to resolve contradictions in hidden assumptions about maps…The ideas should help to protect all from the cartographic deceits perpetuated by the media…a scholarly worked but readable exemplar of the key idea that by deconstructing them, maps can reveal much about changing perceptions of the world. Not intended exclusively for specialists
Geography

The implications of Short's book go beyond the work, to the configuration of ideology itself at the heart of Empire.
http://amsterdam.nettime.org

This is the first book-length effort to tell the story of the mapping of the United States through the lens of the postmodern perspective...the first to focus on this topic with some success...I found his extended vignettes of selected maps and cartographers helpful and interesting, often providing me with fresh perspectives of familiar maps and mapmakers...this is an important work that students of the history of American cartography will want to own.
Imago Mundi

The book presents examples of geographic representations connected to imperial claims, state formation and developing national identity. It is a companion to the broader arguments developed in his earlier *Imagined Country* and illustrates the new orthodoxy of histories of cartography. ..Short advocates a fashionable deconstruction of mapping, but his analysis is refreshingly unpretentious and relies upon telling a story, by focusing upon emblematic maps and key individuals...An attractive and engaging style...Short has the confidence to come up with grand generalizations...The fresh perspective means deconstructing well researched material, telling an appealing story.
Society of Cartographers

uses a subtle mixture of political, geographic and social evolution supported by cartographic developments between the early 17th and 20th centuries. Those interested in understanding the history of the United States land settlement, measurement and public distribution will find this book both useful and entertaining. I am reminded of an axiom stating, "nothing can be properly managed unless it can be measured." This book does a fine job of explaining how this was done with America's land.
California Map Society

The book offers a fresh perspective on North American history and geography…provides an intriguing account of the mapping of America from its colonial origins to 1900…Having undertaken extensive research in map collections, including working with rare archival materials, prominent geographer John Rennie Short provides an account of how maps have both embodied and reflected power, conflict and territorial expansion throughout American history. His richly illustrated text focuses on maps of colonial claims, surveys of the American West and national atlases,
Wordtrade.com/science

Environmental Discourse and Practice-A Reader **(2000)**

I will certainly use these readings for some of my undergraduate and masters course in Environmental Issues and commend the editors for bringing together a collection of readings.
Progress in Human Geography

This book makes an important contribution to a trend in human geography to consider human-environment relationships-specifically environmentalism- more carefully than the conceptual divided between physical and human geographies commonly facilitates...the book does indeed offer a thought-provoking body of texts that will be useful to students of human-environment relations in many social science disciplines...a thought-provoking and useful contribution to explorations of the human ideas about and behavior toward a fragile and ever-changing environment.
Professional Geographer.

Alternative Geographies (2000)

Short writes in a clear and readable prose, describing and offering reflections on such topics as Ptolemy and Humboldt, heart-shaped maps, feng shui and geomancy, and Australian Aboriginal beliefs...he constructs a set of reflections which offer interesting and accessible reading.
Progress in Human Geography

Globalization and The City (1999)

Cited in the summer 2000 issue of 'Civilization', 'The Magazine of the Library of Congress' as one of the "20 Globalization Must Reads".

It is well illustrated with good examples and engaging case studies, particularly those dealing with the representation and commodification of cities in a global marketplace. There is a particularly interesting, if brief, section on the role of the Olympics as a nexus for economic, cultural and political forces which illustrate neatly the interrelationships of civic renewal/pride and economic success. The Australian chapter, as with the Korean chapter, is a thickly descriptive presentation of some fascinating material...These examples, the way Seoul has digested and reproduced a globalised form of American cultural, the way US civic discourses embrace a particular form of entrepreneurialism or the way Sydney's appearance has been affected by the drift of Anglo-American to a Asian-American perspective represents the strength of the book. The text at best provides further detailed examples for those with an understanding of the theories, and offers well written narrative accounts of particular examples of the progression of globalisation in a range of contexts.
Environment and Planning B: Planning and Design

The book deploys refreshingly unfamiliar material- stock market registrations, the tastes of Korean cinema goers- to challenge the loose thinking that has accumulated around the notion of globalization. Teachers and undergraduates will find it both topical and stimulating.
Geography

An extremely useful introductory piece which encompasses a wide range of detailed examples to illustrate the many geographies of globalization and world cities
Progress in Human Geography

New Worlds, New Geographies (1998)

John Rennie Short's *New Worlds, New Geographies* is a provocative and demanding work. It takes on many of the great phenomena of the late twentieth century, including the collapse of the bipolar world, transformations in urban space, and postmodernism's assault on the academy. But, it is not the Big Ideas that make this a demanding work, rather it is his intriguing stab at postmodern textual form. In some ways, this book is among the most accessible to emerge from the growing corpus of postmodernist geographies...Short is at his most challenging in his proposition that authorship and text are at the root of reform. He argues that we must reject such academic conventions as the studious avoidance of the *I* and the dessicated pursuit of objectivity. To his credit, he puts his money where his mouth is...a geographer's provocative attempt to make sense of postmodernism.
Journal of Historical Geography

Magpie book! Frustrating, lucid, chaotic, funny, personal, disconcerting, aggravating, and, perhaps above all else memorable...The content and style of presentation mimic a shift from thinking in and about rational, modern worlds to an engagement with self, roots and debts to others and on to grapple with a shaken faith in modernism and emancipation…he incorporates personal experience and adopts an unusual textual strategy, devices that do yield an engagingly written and potentially influential book. This is certainly no conventional "autobiography"; neither is it a conventional nonfiction account of our new world order. Instead, it is a disconcerting blend of academic analysis, personal reflection, and social positioning… a fascinating example of storytelling in which the author has opened up his uncertainties about the social place of geography and the place of the personal within the discipline
Annals of Association of American Geographers

recommended reading for those needing help to cope with the political changes and challenges of a postmodern world and a new millennium
Midwest Book Review

a self-described 'reluctant post-modernist, doesn't write the impenetrable, jargon-laded prose often embraced by postmodern authors ... This volume combines autobiography initially with political geography, then the sociology of academia, and finally an alphabetic introduction to postmodern ... the most fun is to be had in the final section, where Short plays the role of postmodernist on postmodernism
Kirkus Review

Very good.
Today's Books

Its importance lies in revealing the *Zeitgeist* in recent Western geography...this is a well-written book...the author presents his views in a clear and readable way, not a fact to be overlooked considering the opaque and blurred model of writing common among many postmodern scholars.
Political Geography

There is one thing all readers will agree upon; this is a very unusual book...continues in an accessible writing style while broaching some very basic issues for contemporary academia. This is a human story of dissolving certain ties and continuing fallibilities ...presents a wonderful illustration of the fragility of human knowledges.
Applied Geography

It is a personal narrative rather than an academic treatment of the new world order, global capitalism and personal identity in the 1990s. I found many of his statements perceptive and at times even funny. *New Worlds, New Geographies* might be useful for those who want to explore how particular geographers have sought to link their personal lives to their academic research.
Geography

The Urban Order **(1996)**

This is an excellent book and has relevance for all academic fields concerned with urban dynamics...The work is comprehensive and draws on a diverse range of writings. Specific and specialist topics are brought together in one understandable whole ... should have wide appeal within the academic world of urban geography, social, economic and political studies as well as urban planning and architectural fields of study.
Urban Forum

an enjoyable and provocative read
Geography

An ambitious overview ... The strength of this text are its breadth of coverage, the author's continuing and lively engagement with his subject and his genuine attempt to cross paradigms ... the writing is clear and straightforward, well worth reading ... I shall certainly put it on my reading list

Urban Policy and Change

The work is finely balanced in the consideration of theoretical and empirical considerations ... Short has drawn upon wide-ranging case studies and he provides a clearly set of evaluations of major developments in contemporary urban studies ... An exceptionally well-crafted text.
Geographical Journal

a highly personal, at times iconoclastic readings of the contemporary city ... I found this approach both refreshing and honest ... I suspect many others will appreciate his ambitious attempt to integrate current concerns with the perennial themes of urban studies ... a valuable addition to the relative scarce array of texts which deal directly with questions of post-modern urbanism.
Growth and Change

John Short's knowledge of the urban terrain, his ability to write clearly, to illustrate the book wonderfully, and generally to make the text accessible.
Environment and Planning

An Introduction to Political Geography (1993)

the second edition of Short's books is a most welcome addition to the literature ... the most engaging feature of the author's care and imagination in making the materials accessible through judicious summaries, clear diagrams and carefully annotated bibliographies.
Geography

The efforts of a renewed approach, and the modernity of Short's book constitute an appreciable contribution in political geography.
Tijdschrift voor Economische en Sociale Geografie

This text is a masterful combination of classic and cutting-edge political geography from around the globe. It should have wide appeal.
Michael Brown, University of Washington, USA

This innovative book is an excellent introduction to contemporary political geography. Its threefold structure provides valuable routes into material covering both current theoretical debates and illuminating case studies. It is up-to-date in every sense and enables students to appreciate the discipline's approaches through accessible exemplars.
Ron Johnston, University of Bristol, UK

a critical, versatile alternative to traditional state-centric narratives in political geography and will be a valuable resource not only for political geographers but also for students in such fields as political science and sociology.
Professor Anssi Paasi, University of Oulu

Imagined Country (1991)

a rare achievement
Times Higher Education Supplement

a bold and adventurous attempt by a thoughtful and widely read author.
Environment and Planning

clear in purpose, generous in language and territory, and enormously stimulating.
Area

this is fascinating stuff: clearly written, beautifully produced in paperback (with copious illustration); designed to be dipped into according to interests and a sheer substantive range which means that there are indeed a vast array of vignettes for the reader to become interested in.
Journal of Historical Geography

The Humane City (1989)

I recommend this book as a very readable, well- illustrated and optimistic account of how to make public involvement in cities more than empty rhetoric.
Australian Geographical Studies

this book combines virtues of a good heart with those of a clear and well informed mind. It is well worth reading for its scope and interest of content, and its clarity, honesty and economy of style.
Australian Urban Studies

There are wise words here about passenger transport, sensible housing and close citizen involvement in schools and health provision...a harbinger of new visions for the 1990s and beyond.
Town and Country Planning

Housebuilding, Planning and Community Action (1986)

Readily comprehensible…This book is very relevant; it is presented in a lively fashion….an invaluable source book and a real contribution to our understanding of these complex issues.
Urban Studies

An Introduction to Urban Geography (1984)

This is a concise, well-presented and extremely readable text which draws on literature beyond the narrower geographical perspective... The book deserves to be read by students of the environment.
Times Higher Education Supplement

PRESENTATIONS

Conference presentations and invited lectures at universities around the world, including Amsterdam, Auckland, Barcelona, Berkeley, Bristol, Cambridge, Groningen, Hong Kong, Kuala Lumpur, Liverpool, London (Kings and University College), Manchester, Manila, Melbourne, Oxford, Oulou (Finland), Seoul, Shanghai, Southampton, Sydney, UCLA, University of Western Australia and Yale University. A sample of invited lectures and conference presentations since 1993:

2026 Demograophy as Destiny? **Invited Public Lecture**. Profs and Pints Lecture Series, Pennsocial, Washington DC, 19th MAy.

2025 The New World Order. **Invited Public Lecture**. Profs and Pints Lecture Series, The Perch, Baltimore, 12h November.

2025 Conflict and Cooperation in New World Order. **Invited Public Lecture.** Distinguished Webinar Series, North South University. Bangladesh 14th October https://www.youtube.com/watch?v=SBD6cAgwqSY

2025 The New World Order. **Invited Public Lecture**. Profs and Pints Lecture Series, Hill Center, Washington DC, 17h September.

2025 Dark Skies over South China Sea**. Invited Public Lecture**. Profs and Pints Lecture Series, Hill Center, Washington DC, 29th May.

2025 Flowing Narratives: Exploring the Cultural Significance of Rivers. **Invited Public Lecture**. Shandong Academy of Social Sciences, Shandong, China, April 10th April.

2025 Confessions of a Serial Book Publisher. **Invited Lecture**. Center for Social Science Scholarship, University of Maryland Baltimore County, 13th February. https://www.youtube.com/watch?v=_QbWAo6UZvk

2024 Creating a Vibrant Downtown. **Invited Panelist**. Committee of 100 on the Federal City, 24th April. https://committeeof100.net/conversations-on-creating-a-vibrant-downtown/

2024 The Geopolitics of the South China Sea. **Invited Lecture**. Cosmos Club, 22nd February.

2023 The Crisis of the Downtown in US cities. **Invited Public Lecture**. College of Liberal Arts, Shanghai University, 2nd December.

2023 The Downtown after COVID. **The Dick Wolf Memorial Lecture**. Capitol Hill Restoration Society, 29th September. https://chrs.org/2023-dick-wolf-lecture/

2023 A History of Cartography: From Stone Scratchings to Crisis Mapping. **Invited Public Lecture to Smithsonian Associates**, Smithsonian, 20th June. https://smithsonianassociates.org/ticketing/tickets/history-of-cartography.

2023 The Geopolitics of the South China Sea. **Invited Public Lecture.** Asian Center, University of Philippines Diliman, Manila, 21st March.

2023 The Geopolitics of the South China Sea. **Invited Lecture** Philippines-American Foundation, Manila, Philippines, 14th March.

2023 Geopolitics of the Global South. **Invited Panelist**. National Defense College of the Philippines, Manila,13th March.

2023 The Geopolitics of the Indo-Pacific. **Invited Lecture**. Development Academy of Philippines, Manila 11th March.

2023 The Geopolitics of the South China Sea. **Invited Lecture**, Ateneo de Manila University., Manila, Philippines, 8th March.

2022 ASEAN and the Changing Dynamics of the South China Sea. **Invited Public Lecture** University. Asia-Europe Institute, University of Malaya, 20th June.

2022 Cities after COVID. **Invited Lecture**. Profs and Pints Lecture Series. Washington DC, 9th May.

2022 The storm in the South China Sea. **Invited Lecture**. Profs and Pints Lecture Series. Washington DC, 20th February.

2021 Human capital in a borderless world. **Invited Panelist**. 2020 COVID-19 in The Context of Human and World Regional Geography. **Invited Public Lecture** Oxford University Press. https://vimeo.com/416056090. 7 May.

2019 Crises of the USA. **Invited Lecture**. Diplomatic Academy of Vietnam, Hanoi, Vietnam, 8 November. https://dav.edu.vn/en/prof-john-rennie-short-of-umbc-holds-talk-with-dav-k44-students-majored-in-international-politics-and-diplomatic-studies/

2019 The Unequal City. **Invited Public Lecture.** Village Voices, Washington DC, 9 September**.**

2019 The Unequal City. **Invited Lecture.** Cosmos Club, Washington DC, 12 April**.**

2018 Challenges to globalization. **Invited Panelist**. Mexican Business Summit. Guadalajara, Mexico, 22 October.

2018 Urban resurgence and the making of inequality in global cities. **Invited Lecture**. Chinese University of Hong Kong, 24 January.

2018 Urban resurgence and the making of inequality in global cities. **Invited Lecture**. University of Hong Kong, 22 January

2017 Citizenship by investment. **Invited Conference Presentation.** Cross-border Planning for Private Clients. Dubai UAE, 18 May.

2016 Maritime Disputes in East Asia. **Invited Lecture**. Korea Hydrography and Research Association. Seoul, South Korea, 15 November.

2016 The Revalorization of Time and Space in The City. **Invited Public Lecture**. Universidad ICESI, Cali, Colombia, 1 November.

2016 Cartographic Encounters. **Invited Lecture**. National Endowment for The Humanities Summer Seminar. *On Native Grounds: Studies of Native America Histories and The Land*. Kluge Center, Library of Congress, Washington DC, 9 July.

2016 New Opportunities for The Historical Atlas. **Invited Conference Presentation**. International Seminar on Making of Historical Atlas. Northeast History Foundation, Seoul, South Korea, 19 May.

2016 Urban Resurgence and The Rise of Suburban Poverty. **Invited Lecture**. Jiangxi Normal University. Nanchang, 16 May.

2016 Urban Resurgence and The Rise of Suburban Poverty. **Invited Lecture**. East China Normal University. Shanghai, 11 May.

2016 Urban Resurgence and The Rise of Suburban Poverty. **Invited Lecture**. Shanghai Normal University. Shanghai, 10 May.

2016 Hosting The Olympic Games: Time For A Permanent Home? **Conference Presentation**. Annual Conference of Association of American Geographers. San Francisco, 30 March.

2016 The National Atlas. **Invited Public Lecture**. Washington Map Society, Library of Congress, Washington DC, 19 February.

2015 Urban Resurgence and Suburban Decline. **Invited Lecture**. City University of Hong Kong, Hong Kong, 2 December.

2015 Cities and Climate Change. **Invited Public Lecture**. Universidad ICESI, Cali, Colombia, 17 September.

2015 Urban Resurgence and Suburban Decline. **Invited Public Lecture**. Universidad ICESI, Cali, Colombia, 15 September.

2015 Doing Human Geography. **Invited Lecture**. Sitka High School, Alaska, 1 September.

2015 Cartographic Encounters. **Invited Lecture**. National Endowment for The Humanities Summer Seminar. *On Native Grounds: Studies of Native America Histories and The Land*. Kluge Center, Library of Congress, Washington DC, 22 June.

2015 New Urban Realities: Resurgent Cities, Changing Suburbs. **Conference Presentation** (with Bernadette Hanlon). Annual Conference of Association of American Geographers. Chicago, 4 April.

2015 The New Imperative: Green Cities for an Urban World. **Invited Keynote Address** A Forum of Communities for Urban Sustainability. French Embassy, Washington, DC, 6 March.

2014 Big City, Small World: What Do we Know After Three Decades of Global Cities Research? **Invited Keynote Address** at The City Region Perspective in a Globalized World Conference. Aarhus University, Denmark, 20 November.

2014 Land Use Planning: Three Models. **Invited Public Lecture**. Universidad ICESI, Cali, Colombia, 17 October.

2014 The Third Urban Revolution. **Invited Public Lecture**. Universidad ICESI, Cali, Colombia, 15 October.

2014 Cartographic Encounters. **Invited Public Lecture**. National Heritage Museum. Lexington MA, 4 October.

2014 Poverty and Service Delivery in Suburban America. **Invited Discussant**. US Department of Health and Human Services. Washington DC, 14 January.

2013 Naming The East Sea: Before and After The Cairo Declaration. **Invited Conference Presentation**. Historical Reconciliation and Prosperity in Northeast Asia: 70 Years Since The Cairo Declaration. George Washington University, DC, 2 December.

2013 Expressions Cartographiques de Differends Territoriaux en Asia du Nord-Est. **Invited Conference Presentation**. Seminaire International Coreano-Francophone. Paris, 7 November.

2013 City, Nature and Power. **Conference Presentation**. Annual Conference of Association of American Geographers. Los Angeles, 11 April.

2013 The Restless Urban Landscape. **Invited Lecture**. Michigan State University, East Lansing MI, 29 March.

2012 Cities in Civilization. **Invited Public Lecture.** Symposium on The Work of Sir Peter Hall. Bartlett School. University of London, 25 June.

2012 The Still Restless Urban Landscape. **Invited Public Lecture**. Knowlton School of Architecture, Ohio State University, 23 May.

2011 The Evidence of Maps: Depictions of East Sea/Sea of Japan. **Invited Lecture**. International Seminar on Reconciliation Beyond Discord in Maritime Issues in Northeast Asia. Seoul, South Korea, 16 November.

2011 The Incredible Rise of the Desert Art Movement. **Invited Public Lecture**. Dowd Gallery, State University of New York, Cortland, 27 October.

2011 Cartographic Representation of Korea. **Conference Presentation**. Annual Conference of Association of American Geographers. Seattle, WA. 15 April.

2011 The Spatial Turn: Three Lectures. **Invited Lecture Series**. Central European University. Budapest, Hungary. 31 January, 4 February, 7 February.

2010 Cartographic Encounters on the American Frontier. **Invited Keynote Address**. Cartography and Empire: A Commemoration of the Bicentennial of the William Clark Map. Lamar Center and Beinecke Library, Yale University. 12 November.

2010 Colonial/postcolonial Namings and the East Sea/Sea of Japan. **Invited Conference Presentation**. The 16th International Seminar on Sea Names. The Hague, Netherlands. 21 August.

2010 Betwixt and Between: The Liminal Spaces of the Baltimore-Washington Metro Region. **Conference Presentation**. Annual Conference of Association of American Geographers. Washington DC. 15 April.

2010 Postcolonial Namings in The Aftermath of the Second World War (with Ki-suk Lee) **Conference Presentation**. Annual Conference of Association of American Geographers. Washington DC. 15 April.

2010 Cartographic Encounters on the 19th Century US Western Frontier. **Invited Public Lecture**. *Empires of Science in The Long Nineteenth Century Conference*. Huntington Library, San Marino CA. 9 April.

2009 Suburban Gothic. **Invited Lecture**. Autonomous University of Barcelona. Barcelona, Spain. 19 November.

2009 Bauhaus Revisited. **Invited Lecture**. Bauhaus University, Weimar, Germany. 5 November.

2009 The Suburban Gothic in The US. **Invited Lecture**. Seoul National University, Seoul, South Korea. 26 October.

2009 Creating The Humane City. **Invited Keynote Address**. *Incheon International Conference for Urban Humanities*. Incheon, South Korea 21 October.

2009 New Metropolitan Realities: Implications for the US and Global Regions (with Bernadette Hanlon and Thomas Vicino) **Conference Presentation**. City Futures'09.

Madrid, Spain. 6 June.

2008 *Suburban Gothic: The Crisis in US Suburbs*. **The Edward Wilkommen Public Lecture**. American Geographical Society Library/University of Wisconsin-Milwaukee. Milwaukee. 30 October.

2008 *Cartographic Encounters: Indigenous People and The Mapping of North America*. **Invited Public Lecture**. The Map Society of Wisconsin. Milwaukee. 28 October.

2008 Suburban Gothic in The US. **Invited Lecture**. University of New South Wales, Sydney, Australia. 13 October.

2008 *Going for Gold; Globalization, The Summer Games and Urban Makeovers*. **Invited Public Lecture**. University of Adelaide/Flinders University/University of South Australia. Adelaide, Australia. 3 October.

2008 *New Suburban Realities: Immigration and US Suburbia*. **Invited Lecture**. Flinders University. Adelaide, Australia. 9 October.

2008 *Going for Gold: Globalization, The Summer Games and Urban Makeovers*. **Invited Lecture**. Griffith University. Gold Coast, Australia. 3 October.

2008 *Going for Gold: Globalization, The Summer Games and Urban Makeovers*. **Invited Lecture**. Griffith University. Brisbane, Australia. 1 October.

2008 *Megalopolis 50 Years On*. **Invited Lecture**. University of Queensland, Brisbane, Australia. 30 September,

2008 *The Geopolitics of Naming Seas*. **Invited Conference Presentation**. The 14th International Seminar on Sea Names. Tunis, Tunisia. August 7th.

2008 *New Suburban Realities: Immigration and US Suburbia*. **Conference Presentation**. A Suburban World: Global Decentralization and The New Metropolis Conference. Virginia Tech Metropolitan Institute. Reston, Virginia. 8 April.

2007 *The Urban Impacts of Hosting The Olympics Games*. **Invited Lecture**. Department of Geography, East China Normal University. Shanghai, China. 4 December

2007 *Megalopolis: Trends and Prospects*. **Invited Conference Presentation**. International Symposium on Regional Development of the Yangtze River Delta. Shanghai, China. 1 December.

2007 *Cartographic Encounters*. **Conference Presentation**. Geography and Humanities Symposium. University of Virginia. Charlottesville. 23 June.

2007 *Suburban Gothic: The Problems of The Inner Suburbs in Metro US*. **Conference Presentation**. Urban Affairs Association 37th Annual Meeting. Seattle. 27 April.

2006 *Cartographic Encounters in The New World*. **The Philip Lee Phillips Society Lecture**. Library of Congress, Washington DC. 26 October.

2006 *The Social Deconstruction of A Natural Disaster: The Case of Hurricane Katrina and The City of New Orleans*. **Conference Presentation**. International Geographical Union Meeting. Brisbane, Australia. 7 July.

2006 *Going for Gold: The Urban Impacts of The Summer Olympic Games*. **Conference Presentation**. Urban Affairs Association 36th Annual Meeting. Montreal. 21 April.

2006 *Cartographic Encounters in The New World*. **Invited Lecture**. Medieval and Renaissance Colloquium, Department of English. University of Delaware, Newark, DE. 10 April.

2006 *Reimagining Global City Research*. **Invited Lecture**. School of Media and Public Affairs. George Washington University, Washington DC 13 February.

2006 *Global Cities, Immigration and Cultural Globalization*. **Invited Keynote Address**. Global Cities as Immigrant Gateways Workshop. George Washington University, Washington DC 12 January.

2005 *Black holes, globalizing cities and cultural connections*. **Invited Lecture**. School of Urban Affairs and Public Policy, University of Delaware, Newark, DE. 22 Sept.

2005 *Global City Status and The Olympic Games*. **Conference Presentation.** 5th International Conference on Sport and Culture. Athens, Greece. 30 May.

2005 *Reimagining Global City Research*. **Invited Keynote Lecture.** University of Utrecht, The Netherlands. 24 May.

2005 *Megalopolis Revisited*. **Invited Lecture.** University of Amsterdam. Amsterdam, The Netherlands. 23 May.

2005 *Megalopolis Revisited*. **Invited Lecture.** Johns Hopkins University. Department of Geography and Environmental Engineering. Baltimore. 26 April.

2005 *Megalopolis Revisited: Neighborhoods in A Global City Region*. **Conference Presentation.** Urban Affairs Association 35th Annual Meeting. Salt Lake City. 14 April.
